

Vehicle Wash Mat

Product Specifications

Code: AMCWM, AMCWM-GM

Product Features

Local laws in Australia require water from industrial applications not to mix with stormwater systems. These pose problems for cars and other vehicles that need frequent washing at job sites.

MAXBund Vehicle Wash Mat provides a flexible and portable containment solution for wastewater generated from washing vehicles. UV-resistant and highly durable, our wash mats are made from heavy-duty PVC.

Vehicle Wash Mat is easy to use with its foam bund allowing vehicles to drive over. Submersible pumps can be used to direct wastewater to tanks or suitable drainage facilities.

The optional Ground Mat is used to protect the Wash Mat against punctures caused by rough surfaces.

Wash Mat Specifications - AMCWM

Dimensions 6000mm L x 3000mm W x 75mm H

Weight 30kg

Material 900gsm PVC

Ground Mat Specifications - AMCWM-GM

Weight 7kg
